

MAGNUM CARDINAL

SMALL IS NOW SMART

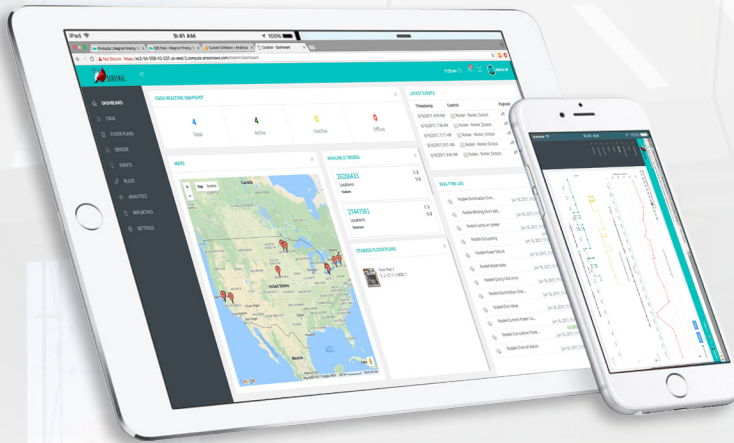

Magnum Cardinal solves the IoT challenge for facility managers and business owners by providing a single platform to connect one or an entire building portfolio. We specialize in small building energy management for buildings under 100,000 square feet.

The Cardinal Proposition:

- Lower total cost of ownership
- Simplified, open platform for future proof investment
- Flexible and scalable to meet specific end user needs

The Cardinal Difference:

- Built on highly secure Amazon Web Services platform
- Wireless devices easily retrofit without disruption
- Streamlined device authentication
